BOS-Ecoline DIN-rail application...

Like the product "ALU-Compact" by our competitor KM-Gehäusetechnik, the BOPLA product BOS-Ecoline is also available for DIN-rail applications.

BOS-Ecoline sizes 840, 1050 and 1240 without wall brackets can be mounted on a DIN-rail using any kind of profile (ELP, ELPH, ELPD) and end lids. The back lid needs to be adjusted and assigned with the DIN-rail holder TSH 35-2. The profile length is chosen individually according to the customer's application.

Yours sincerely,

Marketing Team
